-The great ordnance and engineering works of Sir William Armstrong & Co. extend for near a mile alongside of the river Tyne, while the railroad bounds them on the opposite side. They cover near forty acres. Early in life Sir William entered a lawyer's office, but his tastes pointing strongly to engineering science, he joined the Elswick Engineering Works, then of small importance, where about 1850 he introduced a valua ble specialate in the manufacture of hybraulic cranes. In 1864 it came under his observation that at the battle of Inkerman the Russians were mainly de feated by the fire of a couple of 18-pound ers of superior range, which at a late hour were brought to bear on them. This suggested to Armstrong to design a lighter wrought iron gun, which should be much more available, and in 1857 he produced one which won the entire approval of the War Department. The Secretary of State, recognizing the value of the engineer's services, appointed him Engineer of Rifled Ordnance with £2,000 a year, and he was further made a knight of the Bath. Enormous orders for foreign Clothe, Cassimeres, Cassimetts, Linen, foreign governments have during the last twelve years been executed at the Elswick works. Since 1856 they produced about 4,000 guns from the 14. pounder to the 100-ton gun, lately tried at the Spezzia (Italy) aresenal.

--- A well-educated young man named De Bouyn, has been condemned in France to twenty years' imprisonment with hard labor, and to twenty years of subsequent surveillance, for causing the death in a railroad train of Jean Rozes Salles. Railroad cars for high-priced passengers in Europe are divided into coaches or compartments holding six persons. The murderer and his victim were the sole occupants of a coach, and the death was acid and choloroform. The valuables of the deceased were subsequently taken by De Bouyn, who had been long interested in chemistry, and had endeavored, but without success, to manufacture a comwithout success, to manufacture a combined by the success of the suc pound which would stifle bodies of troops when thrown among them. He was extravagant and dissolute in his habits, and had subsisted upon the earnings of a widow named Thyriot, who was attached to him. He told the Judge that he much preferred a sentence of death to one of long imprisonment.

There is in Paris a vast establishment-the most extensive of its kind in the world-where the imitation of pearls, diamonds, and precious stone generally is carried on with all the skill which modern ingenuity renders possible. The 1 ply of sand, upon which the whole art depends, is found in the forests of Fontainebleau. Palse pearls are lined with wax and scales of the roach and dace, which are to of all makes, including Wilson's celebrated be stripped from the ash while living Pump, which he offers for sale at Baltimore in order to retain the peculiar glistening prices. hue. The setting is always of real gold, and the fashing of the newest kind.

-The Pall Mall Gazette says: "A Scotch Sheriff may be described as a com-Scotch Sheriff may be described as a com-missioner in bankruptcy, a county court as Hair Dressing, Shaving, Shampooning, &c. DANIEL COOPER. judge, a stipendary magistrate, a recorder, a revising barrister, and coroner rolled into one." Walter Scott was for years Sheriff Depute of Selkirkshire, and no doubt his experience in that capacity was oftentimes of signal service when writing his novels. In the same way Gibbon, according to Lord Macauley, owed much of his felicitous power in writing military history to his experience with the Hampshire militia.

- In the language of the tramps, the letter "H" on the gate-post means that the residents will give the caller a handful of grub; "S" that he will get a seat at the table; "S M" that he will get a square meal, and "G B" that he will get the "grand bounce." Now that the secret is out, let every householder hie bimself to his gate-post and dig in letters deep sad that cannot be misunderstood the mystic sign "G B!" Here, at last, is the cents per dozen. Apply at RADCLIFFE'S STORE, complete solution of the tramp problem.

satisfaction or no sale, and challenge any and every other to a trial of Reapers on their merits. In testimony of merit I herewith submit the certificates of farmers known to you all. In this there is no humbug, as you can

meet them and learn for yourselves the truth. Respectfully, DAVID SPRECHER.

POPLAR SPRINGS, HOWARD Co., MD., March 6, 1877 Mr. David Sprecher-Dear Sir: In a full and fair trial with Buckeye, Champion, No. 6, Wheeler and World Reapers on our farm last harvest, it was the unanimous opinion of all present that the Buckeye was the best machine. Table Rake far excelled all others in delivering the grain. It delivers on the side out of the way a straight and compact sheaf as good as any hand rake; no waste in handling the sheaf after it is bound, which no other Self-Rake that we have ever seen would do. After twenty years' experience with machines and through trial last harvest with the of draft and managed so easily when in motion, we do not hesitate in recommending it to farmers as the best machine now in use. Yours Respectfully, TRACEY & WHALEN.

WEST FRIENDSHIP, HOWARD Co.,

January 25, 1877.

Mr. D. Sprecher - Dear Sir: In answer to Mr. D. Sprecher—Dear Sir: In answer to your inquiry as to the comparative Inerits of the Buckeye and Champion Reapers, I hesitate not to say that after a full and satisfactory trial of both, I pronounce the Buckeye the best machine I have ever handled; and that both as a Beaugraph Manur, the Ruckeye has both as a Reaper and Mower, the Buckeye has, perhaps, no equal, and surely no superior. The Table Rake delivers the bundles perfect-Respectfully Yours,

G. W. LEISHEAR. GLENELG, HOWARD Co., MD.,

July 10, 1876.

Mr. D. Sprecher: It gives me the greatest pleasure to state that the Buckeye Reaper, with Table Rake Attachment, bought from you, far surpasses all that I had hoped for, both in reaping the grain and delivering the sheaf. Such is the greatlynes of the Rake. July 10, 1876. 21.00 sheaf. Such is the excellence of the Rake 19.00 that three binders can do as much as five after any other machine and do far better work. For simplicity of construction, lightness of draft, and evident durability, it cannot be excelled. In my opinion it is all that a machine can be in excellence. I advise my brother farmers to buy a Buckeye. Yours Truly, ENOCH SELBY.

1 bought Mr. D. Sprecher-Dear Sir combined Champion Reaper for the harvest of 1875 and was pretty well pleased with it un-til I saw the Buckeye perform in its contest with the Champion on the farm of Mr. David W. Burdette, in the harvest of 1876, and was so satisfied of its superiority over the Champion that I traded with you for a combined the same opinion and pronounce the Buckeye the best machine in use as far as I know. It cuts clean and delivers in nice condition on the side, with no tangle, and any binder can make a nice sheaf with no preparatory labor, which will not scatter the grain in gathering. Fewer binders can do as much and better work. I also like it as a front cut. It is a light draft, durable, easily managed machine. Both as a Reaper and Mower it pleases me. As a saver of grain and labor it must win the favor of the farmer.

I also like it as a front cut. It is a need only a fair trial to become fully appreciated. They are composed of the Purest Materials, selected with great care, and combined in accordance with the most recent discoveries in Pharmacu and Chemistry, and in

Yours Truly,
RICHARD VANSANT,

Mt. Airy. Carroll County, Md. Mr. D. Sprecher-Dear Sir: 1 am much pleased with the combined Table Rake Buckeye Reaper and Mower bought from you. In my opinion it is the only machine that gives the farmer full value for his money. It saves money, because it causes no loss of time in the harvest field, and sheapers made from it do grain clean, and the sheaves made from it do not scatter the grain in gathering and they are in nice condition for shocking and stacking. It saves labor, as three binders can do as much and better work after it than five can after any other machine. It is the strongest light draft machine made and is more at command of the driver by use of levers, both to suit all kinds of grain and to regulate the size of the sheaf than any other. It cuts six feet and yet is easily worked by two horses. As a Mower it is all that a farmer needs. I like it also as a front cut, I would have no other. For safety, service, saving of grain and labor, easy management of the machine, and comfort, both to man and beast, I heartily commend

> JOHN W RHINE, MOUNTAIN VIEW, HOWARD Co.,

Feb. 6, 1577.

Rake side delivery is surely far the best for making good bundles that I have seen or heard of, and I think it cannot be improved. It delivers the bundles on the side out of the way without a particle of tangle underneath and saves at least two binders as well as enables them to make nice sheaves and clean work. In some of the worst down and tangled wheat I have ever seen it went right through cutting smoothly and delivering in good shape. It delivers in good order the tallest wheat, rye and oats, as well as the shortest, and also grain leaning from the ma-etine. In every respect, as a harvester of grain or as a mower, I deem it perfection and would have no machine but a Buckeye. This I say after testing it fully. I believe it to be durable, and I know it to be of light draft, easy on the horses and so easily managed by use of levers (with nothing stashing around the head of the driver like the Champion Rake) that a boy can drive and at the same time lower or elevate the bar and guards to suit light or heavy or down wheat and stop the rake at pleasure, making the sheaves of any size.

Respectfully Yours, JAMES S. RIDGELY

Mr. D. Sprecher—Door Sir: The combined Reaper and Mower bought from you is all right, and I have never made a purchase that pleased me better. It gives me pleasure to commend it as superior to all other machines for many reasons; among which are - lightness of draft, durability, easily managed by the dri-ver to suit short or tall, down or upright grain and I also like it as a front cut machine. But its crowning perfection is the Table Rake, which delivers the bundles on the side in the very best condition free from tangle, and is thus a labor and grain saver. After a full trial I think, both as a Reaper and Mower it can-not be beaten. I heartily indorse the Buckeye.

Yours, &c., JOSEPH SMALLWOOD, "Locust Grove," Howard Co., Md.

ELLICOTT CITT, Aug. 24, 1876. Mr. D. Sprecher: It gives me pleasure to say that the combined Table Rake Reaper and Mower bought from you gives me very great satisfaction. The Table Rake delivers the grain in better condition than I thought any rake could be made to do it. It also cuts the grain clean and as a Mower in my opinion it cannot a Reaper and Mower I think the Buckeye has SEED by
